

IYAMOKUMA INATIMI LUCKY

FULLSTACK DEVELOPER

Timichris45@gmail.com [Timzdigital.site](https://timzdigital.site) [Github.com/lyamokuma](https://github.com/lyamokuma)

SUMMARY

I am a Full-Stack Developer with an active hands-on experience designing, developing, and maintaining modern web applications across healthcare, e-commerce, education, business, and ministry sectors. I have built and maintained projects independently and also as a team. Experienced in developing both frontend interfaces and backend functionality. I am passionate about technology, continuous learning, and product development, with a growing focus on full-stack engineering, SaaS products, cloud technologies, and scalable digital solutions.

PROFESSIONAL EXPERIENCE

Frontend Engineer - AADA's Code Base Limited, UK.

November 2025 - Present

- Contributed to the architecture and technical decisions involved in developing scalable digital frontend products in Aada.
- Architected and developed a web-based ordering platform to digitise the farm's previously manual sales process, replacing fragmented WhatsApp and in-person enquiries with a centralised online customer request and ordering system.
- Developed a web app that allows direct-to-farm ordering, I built the frontend workflow enabling customers to browse available farm produce, submit orders or enquiries, and communicate directly with the farm without relying on intermediaries.
- Integrated third-party services and APIs iarchitectures.

Full-Stack Developer - Dataalcomms LTD, Nigeria.

Jan 2024 - Present

- Worked closely with technical leadership and engineering teams to deliver production-ready features, demonstrating strong technical judgement, code quality, and reliability under demanding deadlines.
- Streamlined development processes, reducing response time by 50%.
- Contributed to the development of technology solutions serving civic, EdTech, and client-focused projects, helping the company expand its delivery capacity across multiple engagements.
- Developed user-facing interfaces for BallotEye, a civic technology platform providing real-time election results intelligence, incident reporting, and situation-room dashboards from polling units to collation centres.
- Developed frontend pages of Lagos state resident residential portal dashboards, which provides a unique identification card (LAG-ID) to prove residency in Lagos, this serves thousands of individuals in Lagos state.

- Delivered practical frontend development training to 300+ students covering HTML, CSS, JavaScript, React.js, responsive web design, Git/GitHub, and modern development workflows.
- Designed and delivered coding exercises, projects, assessments, and practical sessions to develop learners' ability to build and deploy web applications.
- Mentored learners through the complete development lifecycle, including interface planning, implementation, debugging, testing, version control, and deployment.
- Provided one-to-one technical guidance, helping learners diagnose programming errors and overcome development challenges.
- Simplified complex software engineering concepts and adapted teaching approaches to support learners with different levels of technical experience.
- Kept learning materials aligned with current frontend development practices, tools, and technologies.

- Collaborated with designers and senior developers to implement website features and improve user experience.
- Implemented figma designs assigned to me, ensuring the frontend pages are implemented.
- Fixed bugs and pages that lacked responsiveness.
- Tested websites for performance, accessibility, responsiveness, and cross-browser compatibility.
- Develop responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and modern frontend frameworks.

Significant Projects Executed

Paddimi.com - Designed and developed a digital platform that streamlines requests for affidavits and related documentation, including change-of-name services.

- Built the application using Next.js, React, Supabase and API integrations, implementing structured request and payment workflows.
- Replaced a largely manual WhatsApp-based process with a centralised online workflow for submitting and managing customer requests.

Empathcaresolutions.co.uk - Designed and developed the digital platform for a UK-based health and social care provider delivering support and care services.

Built responsive interfaces using modern frontend technologies, focusing on accessibility, usability and clear presentation of the organisation's services.

Created a professional digital presence to improve service communication, client engagement and access to information.

Booksandbits.com.ng - Designed and developed an online bookstore enabling customers in Nigeria to discover and order books through a digital platform. Implemented responsive frontend interfaces and structured product and ordering workflows using modern web development technologies.

- Digitised the traditional ordering process, providing customers with a more accessible and organised way to browse and purchase books online.

Empowerutoday.org - Designed and developed the website for a UK community organisation supporting people with disabilities, chronic illnesses and SEND, alongside their careers. Built responsive and accessible interfaces to present guidance, wellbeing programmes, support resources and community information.

Created a user-focused digital platform that makes the organisation's support services and resources easier for its target community to discover and access.

EDUCATION

University Of Portharcourt

- Bachelor of Science - Geography and Environmental Management

SKILLS

HTML5, CSS3, JavaScript,
TypeScript
Git, Github

React, Next.js
Accessibility & Cross-Browser
Development

UI/UX Implementation
State Management
Responsive Design
Node.js
REST APIs
API Integration
Authentication & Authorisation
Server-Side Development

- **Languages:** English, French, Mandarin.
- **Certifications:**
Software Engineering - **ALX**
Essentials of Data Labelling & Annotation for AI Development - **DataLens Africa**
- **Awards/Activities:** Most Innovative Youth of the Year (2022), Youth Summit NG, Portharcourt Rivers state.
